

Reports of ITeC EOTA Office

European information on innovative products or products not covered by harmonised standards in the European Construction Product Regulation framework

What are they for?

- To be updated on relevant news and documents published at European level
- To have access to new documents (links)
- To better understand the news and documents (comments)

Report Number 8 - Regulation (EU) 305/2011

NEWS

Publication of a Delegated Regulation modifying the classification of reaction to fire

LINK

On March 15, 2016 the Commission's Delegated Regulation (EU) 2016/364 was published. This Regulation, which repeals and replaces the Commission's Decision 2000/147/CE and its subsequent modifications, is already in force.

The main change is the modification of the lower classes F, F_{FL}, F_L and F_{ca} for which a new definition is included. In addition, the subsequent modifications of the original Decision are unified in the same Regulation.

COMMENT

Comment:
In the repealed Decision, the lower classes F were used for those products with NPD (No Performance Determined) and for those which did not satisfy the criteria for classes E. The application of NPD in classes F was not in line with the definition of classes in Regulation (UE) 305/2011, nor with the criteria for the application of NPD in the declaration of performance.

For this reason, criteria have been established for the classification of reaction to fire for classes F (construction products in general), F_{FL} (floorings), F_L (linear pipe insulation products) and F_{ca} (electric cables). The four classifications are also put together in a single disposition.

REPORT CONSULTATION

- > EOTA
- > European Assessment Document-EAD

News example

Who are the reports for?

- For manufacturers, importers and distributors of innovative products or products not covered by harmonised standards
- For construction stakeholders who have no regular or direct access to this European information
- For technicians and specifiers interested in knowing innovative products or products not covered by harmonised standards that can be CE marked

Which information can be consulted?

- Regulation (UE) 305/2011:** Delegated regulations, FAQs and relevant news
- European Commission:** Communications, Reports, Protocols
- EOTA:** conversion of ETA Guidelines into EADs, technical documents and news
- European Assessment Documents (EAD):** newly published EADs and later modifications
- Frequent asked questions:** How are kits considered? What is the EU-LCI concept? What is the European environmental product footprint?
- Articles:** "The kit concept in construction products". "Indoor air quality: VOC emissions from construction products in Europe"

Seventh publication of EADs in the OJEU

The 2016/C 459/08 Commission Communication has been published in the Official Journal of the European Union-OJEU on 9 December. With this communication, the EAD list has been extended to include the following EADs:

Reference and title of the European Assessment Document	Superseded EAD
EAD 040288-00-1201 Factory-made thermal and acoustic insulation made of polyester fibres	-
EAD 060008-00-0802 Chimney kit with clay/ceramic flue liner with classification T400 (minimum) N1/P1 W3 GXX, and with different outer walls and possible change of outer wall	-
EAD 070001-01-0504 Gypsum plasterboard for load bearing applications	070001-00-0504
EAD 090058-00-0404 Ventilated external wall cladding kit comprising metallic honeycomb panel and its associated fixings	-
EAD 120001-01-0106 Microprismatic retro-reflective sheetings	120001-00-0106
EAD 200033-00-0602 Nailed shear connector	-
EAD 200043-00-0103

New published EAD example

When are they published? How can I gain access?

- They are published every three months approximately, after the EOTA Technical Board meetings
- Visit the ITeC website (en.itec.cat) <"Services" "EOTA Information"> and register, indicating an e-mail address and a password
- Free consultation, up to fifteen page views per month
