

Innovation Development and Project Management

Digitization of the construction process

Generation of construction databases, BIM libraries and software to manage and make decisions during the construction process.

Sustainable construction

Evaluation of the circular economy, environmental audits, Life Cycle Analysis (LCA) and Life Cycle Cost (LCC).

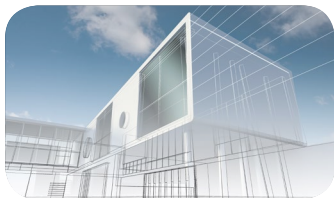

Certification of innovative construction products

Technical guidance, evaluation and technical certification of innovative products, product manufacturing and installation process.

Market studies and trends

Analysis of the innovation in the market for innovative products to measure and improve their competitiveness.

ITeC is a non-profit private foundation at the service of society which supports innovation in construction since 1978.

We work for the improvement of the competitiveness of the agents of the construction sector through:

- Generation and transfer of information, knowledge and tools.
- Provision of technological services.
